

Microsoft Dynamics 365 Education & Training Providers

Developed in partnership with Education Providers

Dynamics 365 Education is a next generation customer relationship management (CRM) system built directly for education institutions and training providers. Built on Microsoft Dynamics 365 Cloud technology it goes beyond being just a standard CRM, focusing on Employer Engagement activities.

Our solution comes 80% 'off-the-shelf' with the ability to be easily adapted and configured to suit your unique needs and processes should you wish. Our team of developers have created plugin tools for many of our customers, including a lead generation tool for employer engagement and a mapping tool to analyse marketing impact.

Dynamics 365 dashboard

Our in-house technical expertise combined with our first class Customer Success Programme is what stands us apart from the rest.

Our clients include

South Devon College, City College Plymouth, Newham College, Moulton College.

Testimonials

"We are now able to report at corporation level the number of employers we are engaging with, how they can support our curriculum design and the pipeline income generation we are expecting to bring in. Active have provided us with an easy to use operational tool, that is reducing the time staff have to spend completing paperwork and has generally professionalised our service to employers and other clients"

Newham College

"We chose Active after a comprehensive selection process where their technical understanding and prior experience of our type of business and the associated system integration needs was clearly demonstrable. We very quickly gained a high level of trust in their technical abilities and have so far enjoyed the process, looking forward to the forthcoming stages."

Moulton College
